Turtle Island Restoration Network

To use your guide: 1. Cut along outer black line 2. Fold on lines

PLEASE...

I am a loyal customer of your business. I am disappointed you sell swordfish.

Most swordfish are caught using outdated and deadly driftnets or longlines, which kill thousands of ocean animals each year.

Some are threatened or endangered whales, dolphins and sea turtles.

This is unacceptable and must stop, now.

HELP!

Less harmful methods exist!

Harpoons and deep set buoys target just swordfish and save endangered species!

Please help save our oceans! Either stop selling swordfish or stop selling swordfish caught with driftnets or longlines.

I'll be using #BoycottSwordfish on social media to bring attention to this issue.

Swordfish Boycott | We've launched a boycott of unsustainably-caught swordfish to stop the slaughter from deadly driftnets and lethal longlines. **Join us!**
