

UTV COVID-19 Safety Protocol

Please patrol in the UTVs solo or patrol with a partner only if you have quarantined together.

Please continue to wear helmets while on patrol, wear masks and gloves. Emergency masks will be provided in the UTVs for the first two weeks. Spray disinfectant and towels will be provided throughout the season. We ask that you provide your own gloves, mask and hand sanitizer. Hand sanitizer is being ordered for the UTVs.

Before and after patrolling:

- Spray disinfectant and wipe down steering wheel, dash, gear shift, door handle, seat belt and keys/lockbox
- Use hand sanitizer after coming in contact with commonly touched items such as locks, lockboxes, gas cans, etc.

While on the beach:

- Wear a mask and use gloves
- Maintain social distance from crowds and nest responders

Please be sure to dispose of trash properly. At Bolivar and the State Park, there are receptacles for us to use. At Beth's house, please take your trash with you.

We believe that the outdoor nature of this work on beaches with plenty of wind and sunlight make this work a low-risk operation and even more so with the proper safety protocols in place.

Above all else, if you do not feel 100%, please stay home and notify Theresa.
Your safety, as always, is our number one priority.
